Our Expertise

Project Planning and Development

- Project Initiations
- Permits, licenses and authorizations

Assessment

- Site Survey
- Load Analysis
- Shading Analysis
- Detailed Feasibility Study

Design and Engineering

- Electrical Design
- Power Plant Layout
- Components Specification
- Detail Project Report

Procurement and Construction

- Components Procurement
- Pre Commissioning Testing
- Final Commissioning
- Quality Adherence Checks

Operations & Maintenance

- System Cleaning & Checkup
- Components Monitoring
- Performance Testing
- Production Reports

Our Clients

Why Solar ?

■ 24/7, 365 Days, 100% Performance

Solar Energy is Renewable Energy which can be harnessed and is available every day, every hour. So bye-bye to power outage and enjoy unlimited energy from Sun.

■ Reduces Electricity Bill

Generating your own electricity means that you are self-power producer and not much dependent on supplier which mean less usage and less bill from supplier.

■ Sell Power Back to Grid

The excess generated electricity during day time can be sent back to grid which can be used back during night time. This way you will have your own savings utilized for your need.

■ Protection from Electricity Price Rises

Always, there is and will be electricity price rise over years but free electricity from Sun will remains free over years and years.

■ Low Maintenance Costs

Solar energy systems generally don't require a lot of maintenance. You only need to keep system relatively clean frequently and monitor reports.

■ Excellent Financial Plan with Low Payback Period

The payback period is generally based on your electricity need and bills and typically is less than 4-5 years. The money invested yields good ROI and gives approx. 18% returns on investment.

■ Increase Your Home Value

Buying a home with solar system translates into lower electricity costs which increases home`s attractiveness and property value. A study conducted concludes that homes with solar system generally sell ~ 20% faster and for ~ 10-15% more money.

■ Solar is a Secure Investment

The money invested in solar is safe and secured and do not change according to market situations. No fear of any loss.

■ Solar is Easy

We are here for you!! Have a trust and relax. Our team of experts will complete all the process from start to end. To see how much you can save, and for all other solar questions, you can request a free consultation.

■ Reduce CO² Emissions

A Rooftop Solar System (RTS) of 1KW saves ~1 ton of CO2 emissions per year which is equivalent of planting ~30 trees per year.
